

FIYMA Program

Date: 30.06.2026

FIYMA RESULT FRAMEWORK

JOYCE KAMANDE-MESPT MEAL MANAGER

Unpacking the programme implementation Pathways

As validate our strategic implementation approaches/ models/ structures etc, we need to ask ourselves the following key strategic questions

1. Is what we are proposing to do addressing the **ROOT CAUSE** and NOT the symptoms of the problem affecting financially disadvantage young women and men?
2. Are our interventions **DIRECTLY** leading to delivery of **MEASURABLE RESULTS** at all times?
3. Which activities **genuinely qualify** and you are **certain they** directly lead to intended programme results
4. Which activities **genuinely qualify but are non-certain** they directly lead to intended programme result; how do plan for them, learning at small scale before scaling
5. Which activities **genuinely non-qualify** hence need to be removed: how does it affect the programme numbers hence you need to plan for.
6. Are the programme delivery channels **DIRECTLY** enabling you to **track programme participants and measure programme results** .
7. Have we **embedded sustainability and scalability mechanisms** in our implementation and delivery mechanism. If not need to plan for.
8. **Ultimate question:** Can we demonstrate that our approach delivers measurable impact?

Unpacking the program Pathways of change and strategic actions linked to program Results delivery

As validate our strategic implementation approaches/ models/ structures etc, we need to ask ourselves the following key strategic questions

1. Is what we are proposing to do addressing the **ROOT CAUSE** and NOT the symptoms of the problem affecting financially disadvantage young women and men?
2. Which activities :
 - ☐ **genuinely qualify** and you are **certain they** directly lead to intended programme results;
 - ☐ **genuinely qualify but are non-certain that** they directly lead to intended programme result; how do plan for them, learn at small scale before scaling
 - ☐ **genuinely non-qualify** hence need to be removed: does it affect the programme numbers hence you need to plan for.
3. Looking at our currently implementation structures, are we intentionally **targeting YOUNG PERSONS WITH DISABILITIES AND REFUGEES**? What adjustments do you need to plan for?
4. Are our interventions **DIRECTLY** leading to delivery of **MEASURABLE RESULTS** at all times?
5. Are the programme delivery channels **DIRECTLY** enabling you to **track programme participants and measure programme results throughout the programme period.**
6. **What adjustments do you need to plan for in programme implementation, tracking and reporting systems**
7. Have we **embedded sustainability and scalability mechanisms** in our implementation and delivery mechanism. If not need to plan for.
8. **Ultimate question: Can we demonstrate that our approach will DIRECTLY delivers measurable impact?**

Presentation outline

Output (do we have mechanisms to track programme participants and measure this effectively)	Strategies actions (does this address the ROOT CAUSE and NOT the symptoms of the problem)	What do we need to do differently to address the real problem and deliver intended results	Key Activities: what activities genuinely and directly lead to programme results: Validate and align
150,000 Financially disadvantaged young women and men having successfully completed entrepreneurship and BDS trainings	Strengthen capacity of YEC to practically deliver entrepreneurship and BDS trainings	Qn: how best do we innovatively CREATE, SCALE AND SUSTAIN results beyond programme implementation period.	• 100 YEC Recruitment and onboarding YEC • 1 Development of customized BDC Tool kits • 100 YECs Undertaking training on entrepreneurship and BDS to YECs • 2000 youth groups linkage with programme participants for coaching and mentorship
Related Outcome 100,000 (80%) Financially disadvantaged young women and men accessing entrepreneurship and BDS	Facilitate entrepreneurship and BDS capacity building initiatives targeting eligible programme participants		• Mapping, selection and onboarding of 30,000 eligible youth group. • Profiling 200,000 eligible individual programme participants. • Undertake 30,000 training needs capacity assessments/ capacity development plan developed • Train 200,000 programme participants on entrepreneurship and BDS
